TDI-Brooks Waste Management Plan

The following is the Company waste management plan policies and should be posted on board the vessel. Shipboard wastes (trash, sewage, gray water, oily wastes, food scraps, and hazardous materials) are governed by U.S. and international laws and regulations. This vessel strives to meet these laws and regulations. Failure to do so may result in significant fines. Consequently, the following is the shipboard waste management plan for this vessel.

1.0 Person in Charge

The master has designated the chief mate as the person in charge of the waste management plan. The chief mate shall:

- Ensure that the vessel waste management plan is in compliance with all required laws, rules, and regulations
- Administer the waste management plan
- Brief all crew members and science/technical party members on the waste management policy
- Maintain records of all waste pick ups and disposal

2.0 Crew Responsibility

All crew members and science/technical staff members shall familiarize themselves and comply with the waste management policy. Any questions and/or concerns shall be directed to the chief mate. Each department head (chief mate, chief engineer, winch operator, and party chief) shall ensure that all individuals under their supervision comply with the waste management plan.

3.0 Waste Management

- It is not permitted to throw any trash or debris (including cigarette butts) overboard this vessel.
- Hazardous wastes are stored separately in adequate containers.
- Oily wastes are stored separately in adequate containers.
- Separate food wastes from other types of refuse.
- Food wastes may be disposed of overboard by the galley crew only at approved distances from shore
- Sewage may be disposed of overboard by the engineers only at approved distances from shore.
